Auctioneer: Donald D'Amato

Howard D. Egolf was born in Norristown, Montgomery County, Pennsylvania, on March 7, 1893. He was the youngest son of Gus and Catherine Egolf, who emigrated to the Philadelphia area from Baden, Germany, before the Civil War.

Mr. Egolf attended the local elementary schools and was graduated from Norristown High School in 1912. He immediately became associated with his family in their business as furniture dealers. He retired in 1957. He married Edna H. Heimer on November 19, 1956.

He was active in civil and fraternal affairs. He was also a 32nd Degree Mason.

From boyhood, he showed an avid interest in coins and stamps. He was very active in the Boy Scout movement. For many years he served on the Honor Court and judged applicants for Honor awards for coins and stamps.

Throughout his lifetime, he organized stamp and coin clubs in area schools, thereby encouraging this interest among the young students. He was founder and past President of the Valley Forge Philatelic Society. For years, he exhibited in both stamp and coin shows in the area and won many prizes. He was a member of the Stamps Booster Club. He is listed in the Blue Book of Philately.

His reputation as coin collector was well respected. He had membership #1902 in the American Numismatic Association.

In retirement, he kept up his great interest in coins and stamps. Even during his last illness and within a few hours of his death, he gave instructions to Mrs. Egolf to acquire certain stamps and coins. He was an enthusiastic and wise collector of stamps and coins to the end.

Howard D. Egolf's father was originally interested in coins prior to the Civil War and retained his interest through the years. He formed a small collection which was later expanded upon by Howard Egolf. The Egolf family, though quite large, had only one dedicated collector — **HOWARD D. EGOLF**.

CONFEDERATE CENT AND HALF DOLLAR

RARE CONFEDERATE STATES SMALL CENT

NOTE: *The origin of the Confederate Cent is so full of human interest that the story is always interesting and will bear repetition occasionally as new collectors come into the field. Naturally, this being the centennial year of the founding of the Confederacy makes it doubly interesting. It was told by Capt. John W. Haseltine, an old time coin dealer in Philadelphia at the convention of the American Numismatic Association in that city in 1908. It is reprinted here, exactly as it appears in the August, 1942 issue of the Numismatist. Captain Haseltine said:*

"I have been asked to say something about the so-called Confederate cent. A little circular issued by myself and Mr. Randall some years ago tells all the history of the striking of those pieces, but I do not think it mentioned how I obtained the dies. One day I was told by a gentleman that a bartender in West Philadelphia had a Confederate cent. I doubted it. Mr. J. Colrin Randall (now deceased) was told the same. He conferred with me in reference to it and we decided that if either of us obtained it we would share any profit that would accrue from it. I saw the bartender and purchased the coin from him. It was in nickel and he said he received it over the bar. I knew by the head on the obverse it was Mr. Lovett's work. I called on Mr. Lovett, and he denied ever having made the dies. Numerous times I called to induce him to give me some information about them, but he always stuck to his story that he did not make them until one day, when he became a little careless, he pulled out a drawer in one of his cabinets and I beheld a line of little Confederate cents. Of course, I questioned him at once, and he then owned up and told me that he had eleven of them, but formerly there were twelve, he having lost one. He said he received the order to make them for the Confederacy through a well-known jewelry firm in Philadelphia and that his wife became timid about his delivering them for fear the United States Government might arrest him for giving assistance to the enemy, so he buried them in his cellar until long after the war was over and even then he was afraid to show them. I purchased the dies from him and as you all probably know, did not strike any in nickel, considering them to a certain degree as originals, but we had three struck in gold, and I believe five in silver and fifty-five in copper, the die breaking on the fifty-ninth piece, which is in existence showing the break in the die."

- 776 **1861 Cent.** Obverse, head of Liberty with cap facing left, six stars incused on band; date below: CONFEDERATE STATES OF AMERICA Reverse, 1 CENT in wreath. Copper. Brilliant iridescent Proof. Extremely rare and valuable. Last sale rumored to be at \$600.00.

RARE CONFEDERATE RE-STRIKE HALF DOLLAR

- 777 **1861 Half Dollar** with obverse of regular issue of 1861. The reverse was smoothed down and the Confederate die struck thereon Liberty cap and shield within wreath: "Confederate States of America" above; "Half Dol." below. Records show only 4 original coins were struck (due to a lack of available coin), however, only two are known to exist. The **Restrike** offered here, was struck by J. W. Scott in 1870. Only 300 were struck (estimated) after which the die broke. This coin is in Extremely Fine condition with much mint lustre still adhering. This coin is quite popular and very much in demand today. Recent sales records of over \$400.00.

EARLY U.S. PROOF SETS

1859-1915

IMPORTANT NOTE: The following sets of Early Proof Coins are original Proof Sets as issued by the Philadelphia Mint. These Sets are not "put-together" Sets. All were in the original mint wrappers used at the time of issuance. To facilitate and protect the handling of these magnificent coins when being examined prior to the sale and shipped after the sale, we have taken the liberty of placing each coin in a separate polyethylene tube. However, included with each set is the original wrappings. These superb quality sets are without exception, as beautiful as the day they were struck and throughout the years have taken on some of the most magnificent rainbow hues that one should never desire to remove by cleaning. Tarnish can be removed but only the years can produce the superb rainbow effect found on these early classic coins.

Note: This curious mark is definitely attributable to a Trinidad counterstamp. Many of our early coins have this mark as they circulated in the Antilles. A description of a similar type of counterstamp can be found in "Counter-stamped Coins of the Americas" by Howland Wood. See page 109, fig. 85.
